

Note : If python 3 is not installed in a system use an IDE like pyCharm which comes with builtin python3 environment

Alternatively you can download python 3 from <https://www.python.org/downloads/>

First clone the git repository or download as zip from the given link :

https://github.com/Tarunasudani/placement_portal

1. *git clone https://github.com/Tarunasudani/placement_portal.git*
or download and extract the zip
2. Cd to the project folder in a terminal
3. Install the requirements with the following commands :
pip3 install requirements.txt
4. Migrate the database :
python3 manage.py migrate
5. Run the project :
python3 manage.py runserver
6. Open the following url in your browser :
http://127.0.0.1:8000/
